

## MasterMind game rules

### the object . . .

I have selected a secret combination of colored pegs:

Guess that combination in 10 or fewer tries to win.

### how to play . . .

For each of my four peg positions I have chosen from six possible peg colors:

I can use a peg color more than once, so the combination could contain anything from 4 different colors to 4 of the same color:

example 1:

example 2:

example 3:

To create your guess click each choose button to cycle through the colors until you're satisfied with your combination:

Then click the "check my guess" button:

Each time you submit a guess I will use score pegs to let you know how close that guess is:

For each guess a black score peg indicates that one of your pegs is the right color in the right position. A gray score peg indicates that one of your pegs is the right color in the wrong position:

my secret combination:

your guess:

your score:

Use the score to guide your next guess. If your guess scores 4 black score pegs within 10 tries, you win.

To begin a new game click the "new game" button:

Good luck!
